Module Name:Selenium Environment Setup
Test Case ID:ST_13
Webpage URL:https://sauce-demo.myshopify.com/

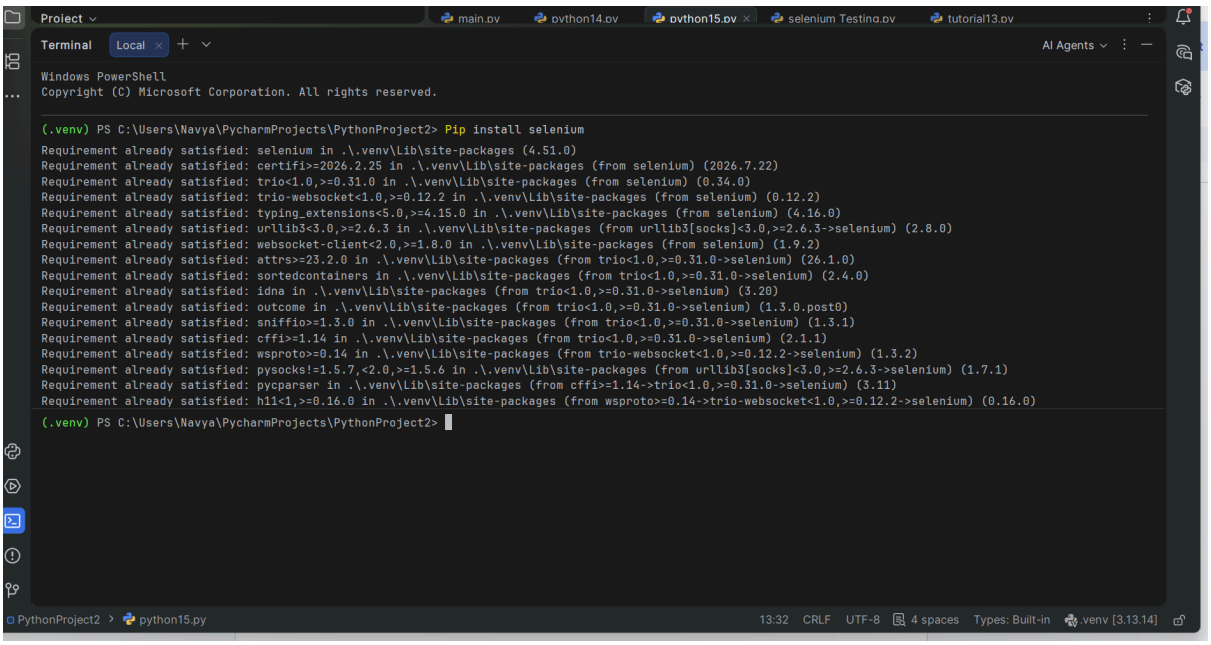

Scenario_ID:TC_01
Scenario:Python Version

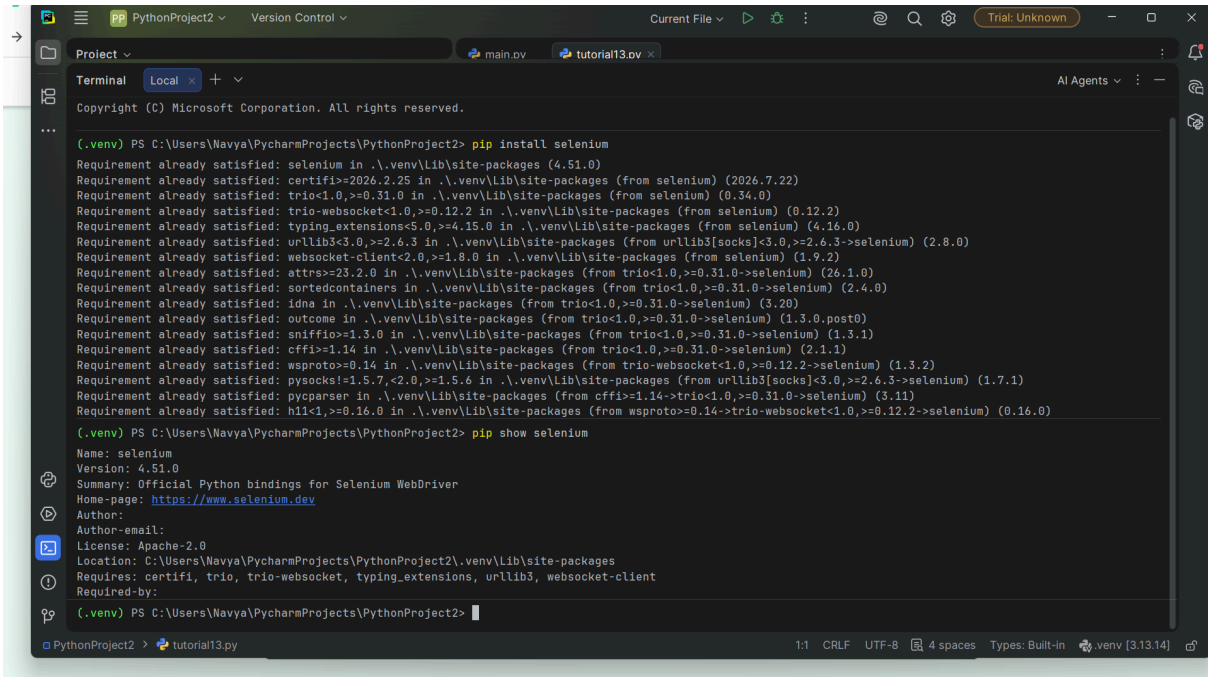

Scenario_ID:TC_02
Scenario:Pycharm Project

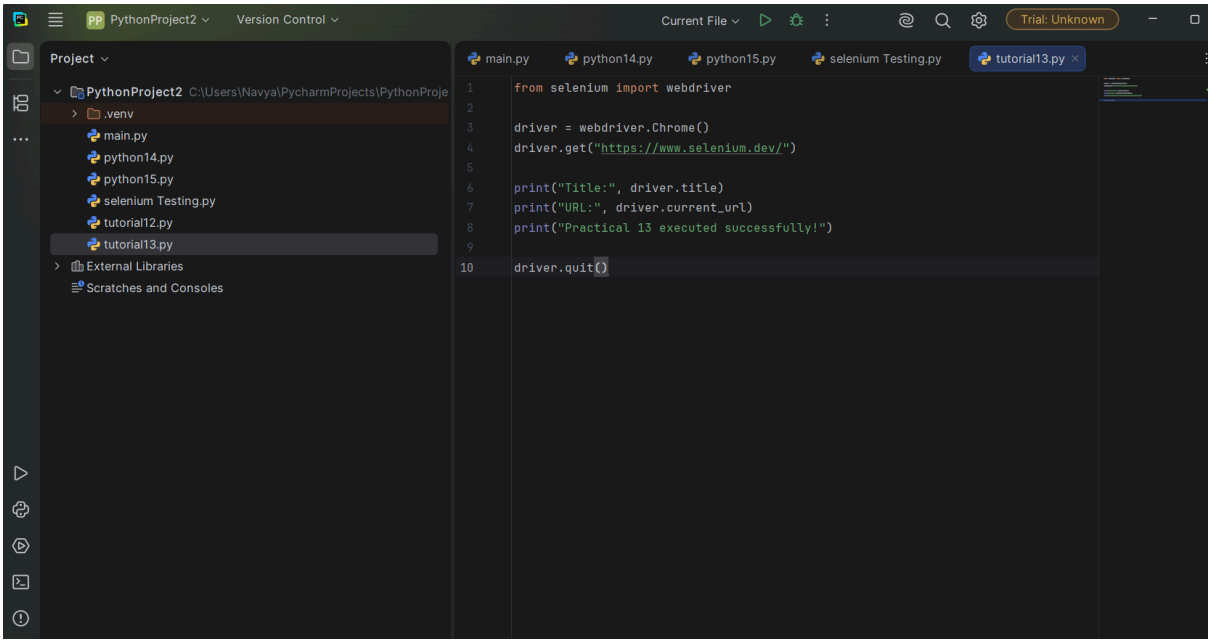

Scenario_ID:TC_03
Scenario:Install selenium

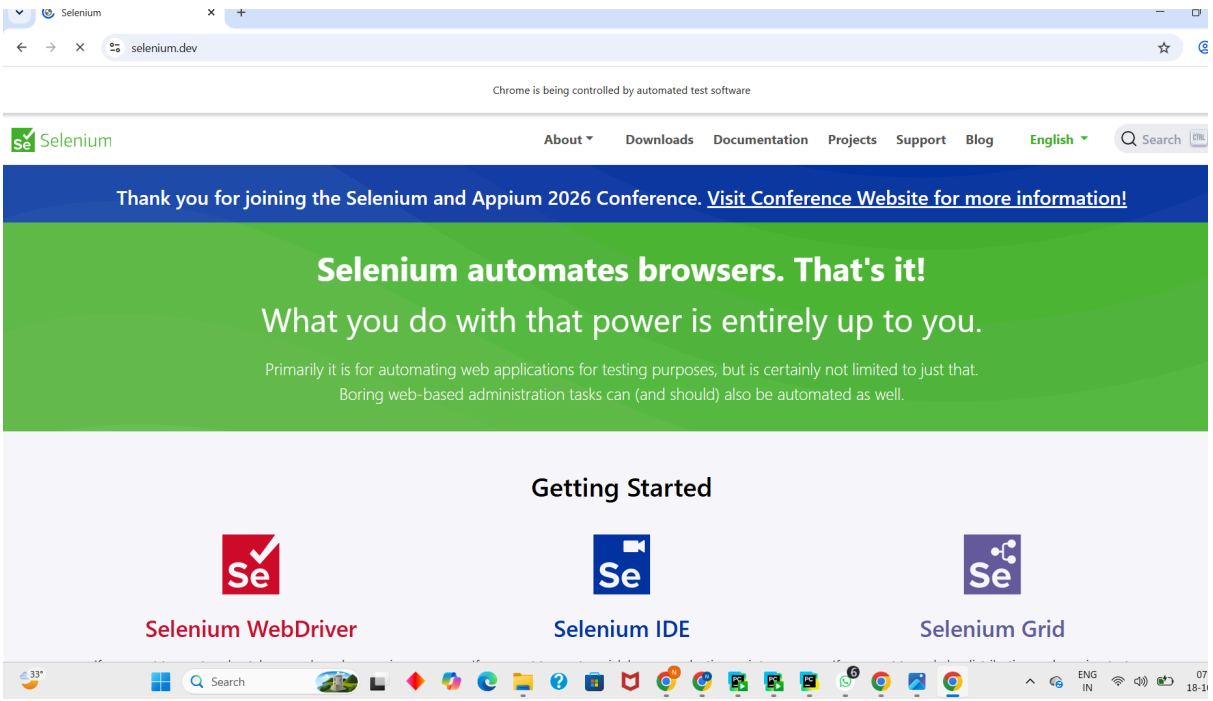

Scenario_ID:TC_04
Scenario:Show Selenium

Scenario_ID:TC_05
Scenario:Source Code

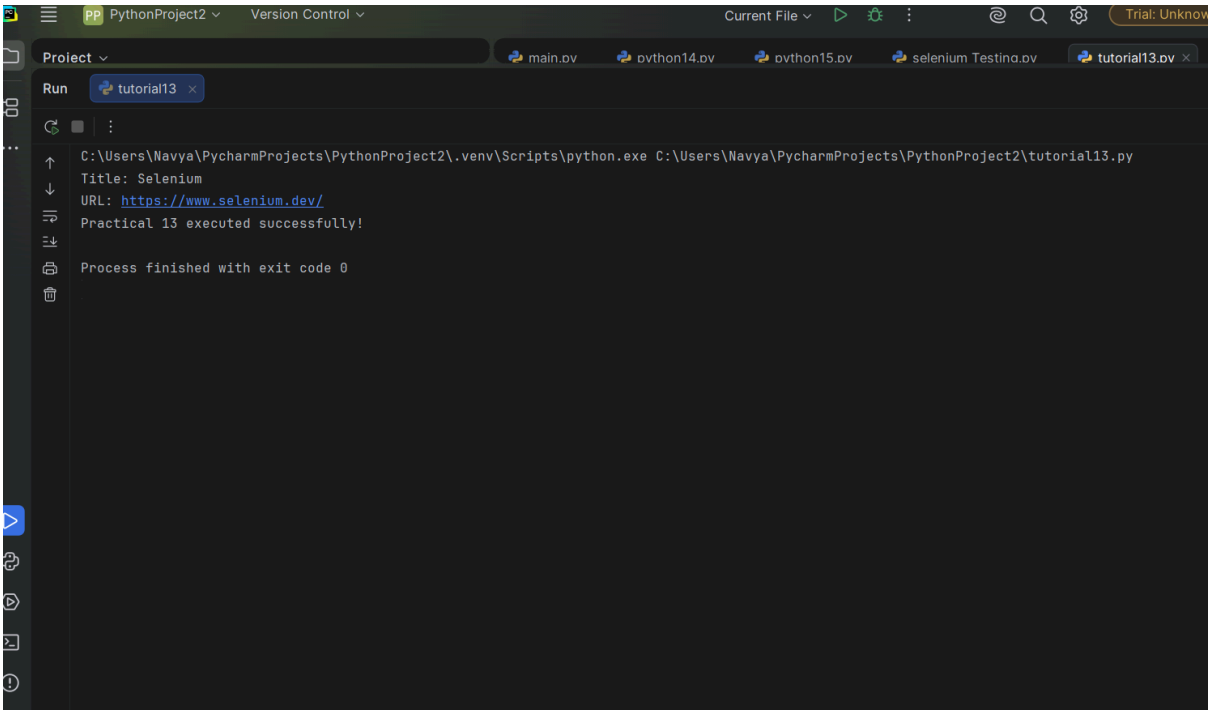

Scenario_ID:TC_06
Scenario:Chrome Browser

Scenario_ID:TC_07

Scenario:Console Output

Conclusion:

A correct environment is the base for all automation. The browser launch and page-verification script confirmed that Selenium was installed and working.

Summary:

Python, the selenium library, an IDE (PyCharm/VS Code) and Chrome with its driver were installed and configured. A script launched Chrome, opened the Selenium website and printed the page title and URL. SDLC–STLC mapping and project artifacts were documented.
