Module Name:Bugzilla & Testlink
Test Case ID:ST-08
Webpage URL:https://www.bugzilla.org/
https://testlink.org/

Scenario_ID:TC_01
Scenario:Test Link Product

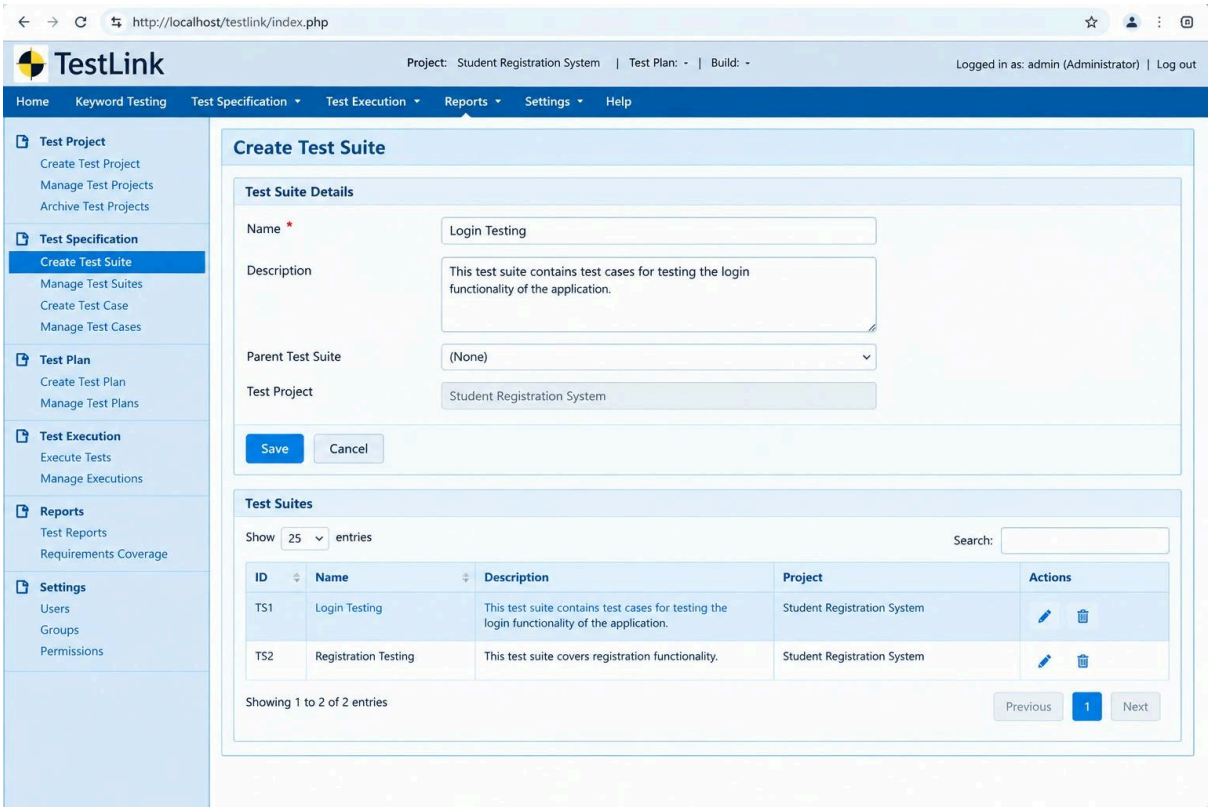

Scenario_ID:TC_02

Scenario: Test Suite Creation

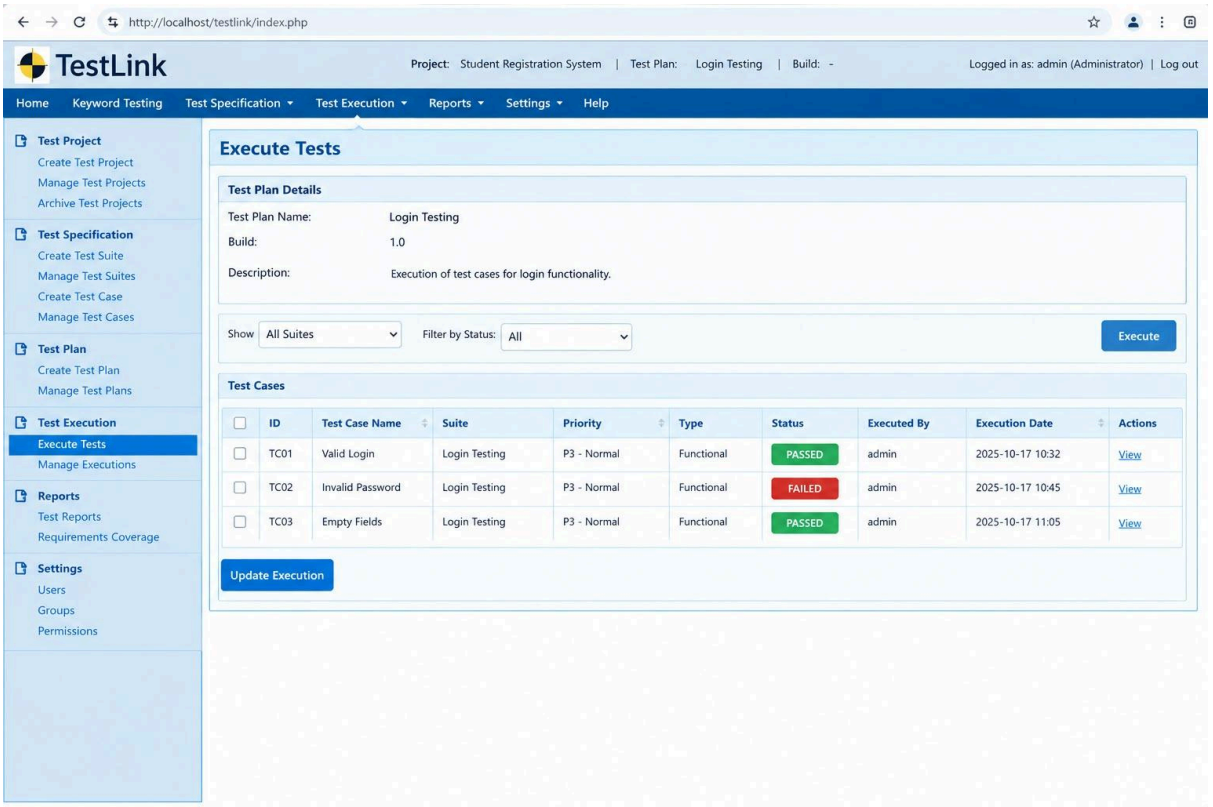

Scenario_ID:TC_03
Scenario:Test Case Creation

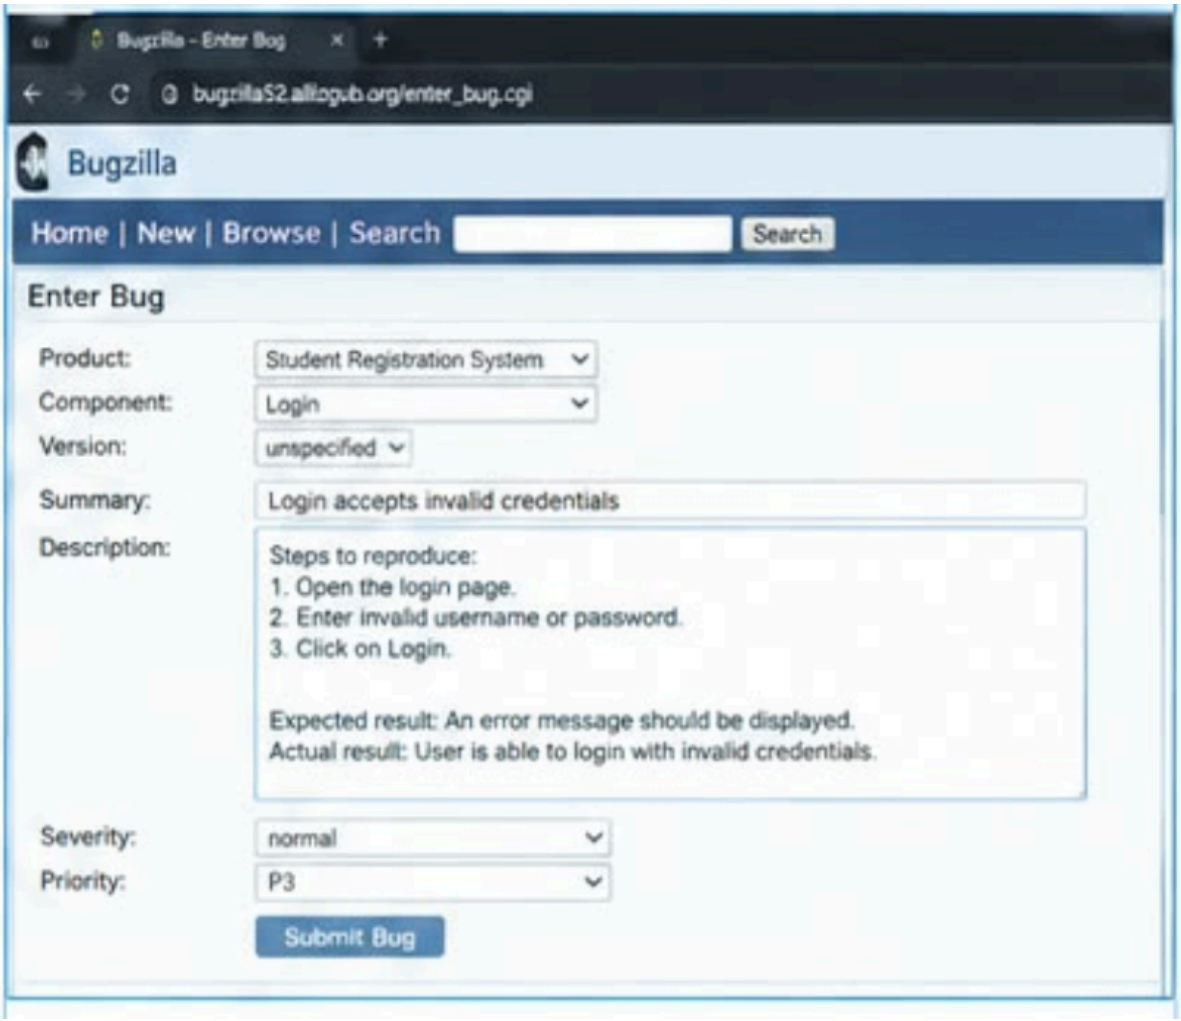

Scenario_ID:TC_04

Scenario: Test Case Execution

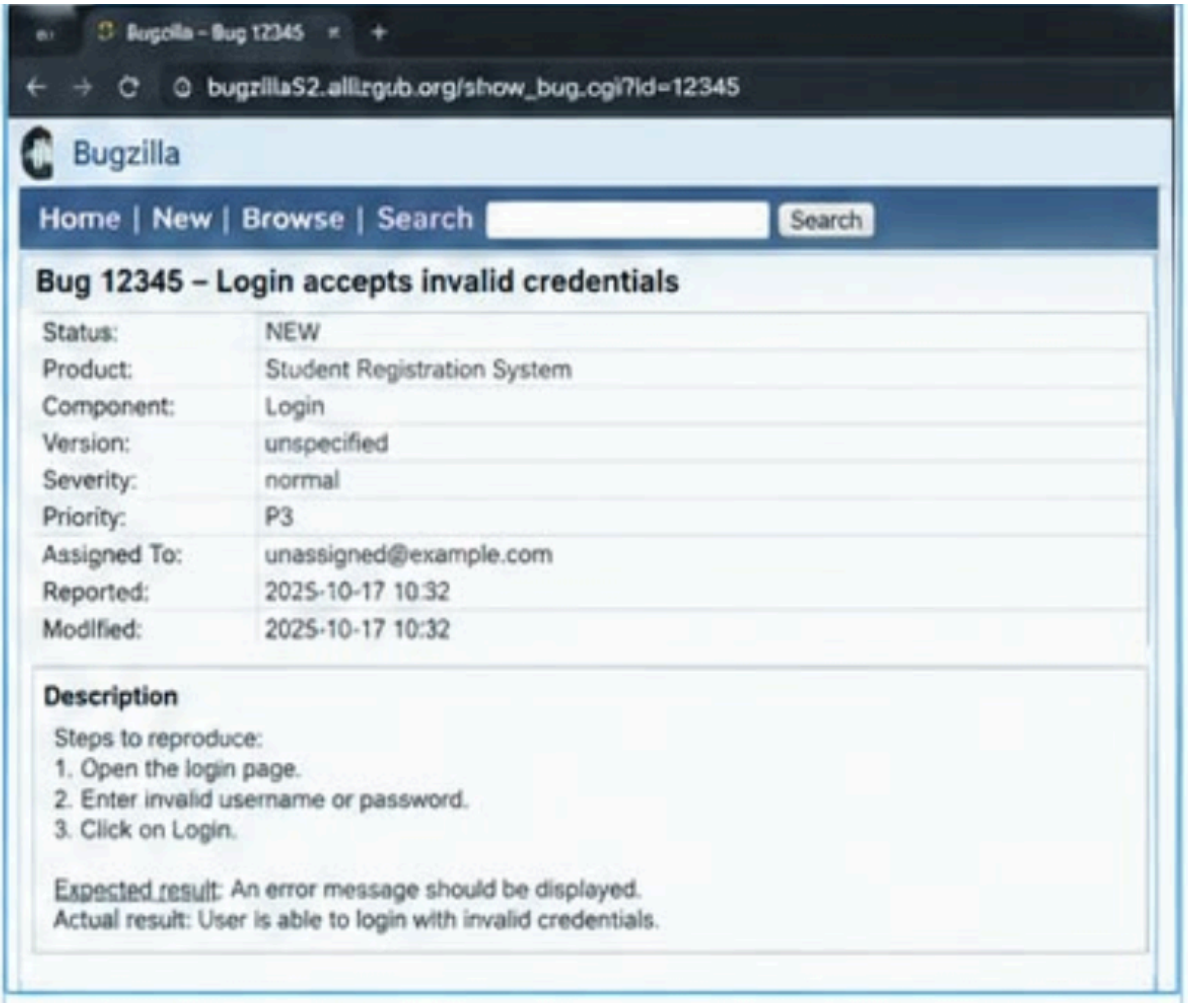

Scenario_ID:TC_05

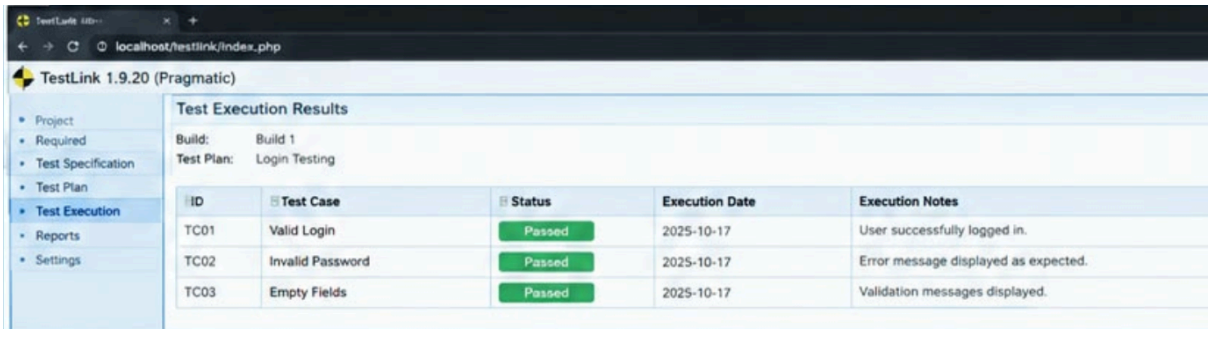

Scenario:Bugzilla Defect Creation

Scenario_ID:TC_06
Scenario:Defect Status

Scenario_ID:TC_07
Scenario:Final Execution Result

Conclusion

TestLink manages test cases and execution results, and Bugzilla manages the defect life cycle. Together they give traceability from test case to bug and make reporting organised.

Summary

In TestLink a project, test suite (Login Testing) and test cases (Valid Login, Invalid Password, Empty Fields) were created and executed. A defect was logged in Bugzilla with summary, severity, priority and description, and its status was tracked from NEW.
